Northstar Academy | Fees and payments

Fictional practice data

This document contains invented policies for the October 2026 RAG practice dataset.

Payment options

Python Foundations costs INR 4,800 and RAG Starter costs INR 6,200. Both courses may be paid in full or in two equal installments. The first installment is due at enrollment; the second is due before the third class. There is no installment surcharge.

Bundle offer

A learner enrolling in Python Foundations and RAG Starter together receives INR 1,000 off the combined fee. The combined payable fee is INR 10,000. The bundle may be paid in two equal installments of INR 5,000. No other discount can be combined with the bundle offer.

Receipts

A payment receipt is emailed within 2 working days of successful payment. If a receipt is missing after that time, contact billing@northstar.example and include the enrollment ID. These example addresses do not provide real support.

Northstar Academy | Refund policy

Cancellation before a course

For a single-course enrollment, a cancellation requested at least 7 calendar days before the first class receives a full refund. A request made 1 to 6 calendar days before the first class receives an 80 percent refund of the paid course fee. No refund is available on or after the first class date.

Processing and exceptions

Approved refunds are processed within 10 working days to the original payment method. If the academy cancels a course before it starts, the learner receives a full refund. Bundle cancellation terms are not specified in this practice dataset; do not apply the single-course policy to a bundle without further information.

Example

If Python Foundations was paid in full and a learner cancels 3 calendar days before the first class, the refund is INR 3,840. This is 80 percent of INR 4,800. Missing a class does not itself create refund eligibility.
