Northstar Academy | Learner support

Fictional practice data

This is invented support information for a RAG learning project. All times use IST.

Support hours

The learner support desk operates Monday through Friday from 9:00 AM to 6:00 PM IST. It is closed on Saturdays and Sundays. Email support@northstar.example for account or access problems. The target first response time is 1 working day; this is not a promise that the problem will be resolved within that time.

Missed classes and recordings

Learners who miss a live class can use its recording. A recording is normally posted within 24 hours after the class ends. Recording access lasts for the period stated in the relevant course handbook. Watching a recording does not count as live attendance for certificate eligibility.

Access problems

If a paid course is missing from the dashboard, send the enrollment ID and payment date to support. Never send passwords or API keys. Learners should check their spam folder before reporting a missing enrollment email.

Northstar Academy | Mentoring and equipment

Mentor sessions

Each RAG Starter learner receives two individual mentor sessions of 20 minutes each. Book at least 48 hours in advance. Reschedule at least 12 hours before the appointment to retain the session. A late cancellation counts as a used session. Python Foundations does not include individual mentor sessions.

Equipment loans

The academy lends laptops only for on-site workshops. A refundable deposit of INR 2,000 is required. A laptop must be returned by 5:00 PM on the workshop day. Equipment loans are not available for online classes.

Questions outside the dataset

This dataset gives no hostel prices, placement guarantees, scholarship rules or mentor phone numbers. For such questions, the assistant should say it cannot find the information in the supplied documents.
